Windows Phones Tested: LG Optimus 7, Nokia Lumia 610, Nokia Lumia 710, Nokia Lumia 800

Technical

5.5 Content Validation

5.5.2

Requirements

Application content, such as text and visual elements, must be visible and legible regardless of the phone theme. For example, if the phone theme changes from black background to white background, the text and visual elements of your application must be visible or legible.

Expected Result

Test Process Required:

1. Navigate to the Settings page in the app list.
2. Tap theme and change Background to 'Dark'.
3. Launch the application.
4. Verify that the text and visual elements of the application are visible and legible.
5. Navigate back to the theme page under Settings, and change Background to 'Light'
6. Launch the application.
7. Verify that the text and visual elements of the application are visible and legible.

Comments: At least portions of the application is not legible when viewed in the Light theme.

Result: Fail

STEPS TO REPRODUCE

1. Navigate to device Settings page.

2. Tap theme and change Background to "light".

3. Launch the application.

4. Navigate to the "Start" page.

5. Notice that the text and visual elements are not legible.
